

SOHO LAVATORY PAN AND CLOSE COUPLED CISTERN

The Soho lavatory pan goes well with any of the French basins with squarer detailing. It is shown here with a closed coupled cistern and seat in black painted wood. It can also be used with a high level, low level or concealed cistern. It is available as an S or P Trap. Please note that the cistern we supply has a side flush handle, not a top flush button as shown in the drawing below.
